

# Les Mercredis Scientifiques de l'HUDERF

de 12h15 à 13h30, auditoire Pr. Henri Vis

02/03/2016

## Les dépistages néonataux à l'ULB-VUB : défis et perspectives

**Dr Laeremans Hilde** is the head of the laboratory of paediatric research at the Université libre de Bruxelles. This laboratory is the biggest screening laboratory in Belgium, performing analysis for both communities in Belgium. The laboratory has a close collaboration with UZ Brussel and is a part of the neonatal screening centre at the UZ Brussel namely VCBMA. The laboratory performs analysis for the follow up of metabolic patients for different CEMAs (Center of expertise for guidance and treatment of metabolic diseases).

### Main focus:

- newborn screening
- follow-up of metabolic patients

### Research:

- lysosomal storage disease
- homocystinuria
- drug compliance

### Experience:

- board member Metabolics.be
- member International society of newborn screening
- member advisory board Flemish community for neonatal screening
- member advisory board French community for neonatal screening
- member of 'Interkabinettenwerkgroep (IKW) 'Mucoviscidose''
- consultant for the KCE for newborn screening
- consultant for SOBI and Alexi

Hôpital Universitaire des Enfants Reine Fabiola  
Avenue Jean-Joseph Crocq 15, 1020 Bruxelles
